Renovate and Remodel with ARI Construction

Voted Bay Area's Best General Contractor

Home—it's your own personal haven where you can feel safe and comfortable. So, if you are considering a home renovation project, you don't want to trust your home to just anyone. You need a company with experience and expertise, that will listen to your ideas and wishes and can make your dreams a reality—a company such as ARI Construction. Voted the Bay Area's Best General Contractor in 2009, the professionals at ARI Construction would love the opportunity to work with you. Whether you want to add a room or update a tired, obsolete kitchen or bathroom, ARI Construction is the Bay Area's one-source solution from design to completion.

QUALITY YOU EXPECT, SERVICE YOU CAN TRUST

Founded in 1996, ARI Construction is a premier, full-service designer/builder, restoration and remodeling firm. Known throughout Greater Houston for its professionalism, expert craftsmanship and superior customer service, the company continues to thrive in an industry that has seen a slowing trend in recent years.

"Our goal is always to exceed our clients' expectations," said ARI owner Mike Muller. "We go above and beyond with the kind of customer care that makes a huge difference in their total experience." Mike credits his experienced team with much of the company's success. "Because communication is a key element in every project we do, we ensure a seamless relationship exists between our field superintendents, clients, quality control department, and our office personnel." At the end of the day, happy and satisfied customers are what make ARI Construction so successful. "A referral is the best compliment you can get in this business."

ARI Construction's spacious facility includes an impressive remodeling showroom and design center with kitchen vignettes featuring custom-built cabinetry as well as granite and other natural stone options for countertops and floors. In-house designers are available to help with everything from lighting, hardware and fixtures to paint colors and finishes.

ARI Construction Design Center

Ed and Harriet Liebman have lived in the Bay Area for more than 40 years. At their daughter's recommendation, the Liebmans called ARI Construction when they were ready to do extensive renovations to their home. It was the best decision they could possibly have made.

"They took care of everything," said Harriet. "It was so nice to have one contractor who handled all of the different pieces. Working with ARI Construction took all the stress off our shoulders because they listened to us, kept us informed and were there when we needed them."

Today, the Liebmans have a beautiful new kitchen with custom cabinetry and countertops as well as a new roof. "They really do great work," said Harriet. "We are very happy with the results."

YOUR IMAGINATION IS OUR BLUEPRINT

Real estate studies show there are no better home-improvement projects for return on investment than kitchens and bathrooms. Why not let 2010 be the year you finally have the beautiful, updated kitchen and bathroom of your dreams?

ARI Construction is a proven expert in residential renovation and remodeling with a large and experienced staff that stands behind each project. "Whether you're looking to update your kitchen with new, custom-built cabinetry or you want to add a room to your house, our team of remodeling experts will work with you to bring your project to life," said Mike. "And we won't leave until you're fully satisfied with the final result. That's our promise."

ARI Construction is very active in the community, and we are members of four local area chambers of commerce including Clear Lake, League City, Pearland and Friendswood. In 2009, Pearland Chamber of Commerce recognized ARI Construction as Member of the Year. The Houston Port Region Economic Alliance recognized ARI Construction as Business of the Year in 2009. Plus ARI Construction is registered with the Texas Residential Construction Commission and is fully insured.
